Resume

Full-Stack Software Engineer with **3 years of experience** developing web applications across the entire software development lifecycle, from requirements gathering and solution architecture to implementation, system integration, deployment, and production support. Experienced in building scalable solutions using **Python, React, TypeScript, Node.js, and PostgreSQL**, with a strong focus on **RESTful APIs, automation, AI-powered workflows, system integrations, and high-performance applications**.

Experience

Grupo Mega Remote
Software Engineer 12/2025 - 07/2026

- Developed and maintained web applications using Python (FastAPI), Node.js, React, TypeScript, and PostgreSQL, building internal platforms for campaign management, marketing funnels, offers, and business process automation.
- Designed and implemented RESTful APIs to integrate applications, databases, and third-party services, improving communication between systems and automating business workflows.
- Built automation solutions using Python, AI APIs, and n8n, creating intelligent agents and workflows for data processing, campaign auditing, content generation, validation, and operational automation.
- Developed a complete campaign management platform featuring version control, advanced filtering, A/B testing, role-based permissions, and workflow management, reducing campaign setup time from 3 days to less than 1 day.
- Collaborated closely with Marketing, Paid Media, and Product teams, participating in requirements gathering, backlog refinement, feature development, and continuous campaign optimization.
- Developed and localized landing pages and digital experiences for international markets, including English and German-speaking audiences, adapting content and UX to regional user expectations.

OFM Systems Maceió, Brazil
Software Engineer 09/2025 - 12/2025

- Participated in the end-to-end development of web applications, from requirements gathering, stakeholder interviews, UX definition, interface prototyping, and solution architecture to frontend, backend, and integration implementation.
- Built scalable applications using React, TypeScript, Node.js, Python, and PostgreSQL, developing REST APIs and integrations with internal and third-party systems.
- Developed a WhatsApp-integrated platform for educational institutions using Python, AI, and automation, enabling automated student support, debt negotiation, student recovery, and lead generation, significantly improving response times and operational efficiency.
- Contributed to the development of a platform for accounting firms supporting Brazil's Tax Reform, automating tax workflows, client management, compliance tracking, and operational processes.
- Worked alongside multidisciplinary teams during discovery sessions, requirements refinement, sprint planning, and solution validation with clients and business stakeholders.
- Led the UX research and interface prototyping phase for the accounting platform, translating business requirements into functional solutions before participating in the full implementation.
- Developed AI-powered agents and conversational automation workflows using Python and AI APIs, reducing manual work and improving user experience through intelligent process execution.

Instituto Livia Rocha Maceió, Brazil
Systems Analyst Intern 06/2024 - 06/2025

- Supported the development of a healthcare management system for neurodivergent children, participating in workflow definition, feature validation, and communication between technical and business teams.
- Helped define functional modules including appointment scheduling, medical reports, clinical progress tracking, parent-professional communication, notifications, billing, and financial management.
- Performed functional testing and validation of critical workflows, reducing inconsistencies before production releases.
- Presented the system to public officials, including the Mayor of Maceió and healthcare administrators, during the implementation of the city's Autism Care Center.

Skills

Python • TypeScript • JavaScript • React • Next.js • React Native • Node.js • Express.js • FastAPI • PostgreSQL • SQL Server • Prisma ORM • REST APIs • JWT Authentication • API Integration • Webhooks • Database Modeling • Software Architecture • Docker • Git • GitHub • CI/CD • Linux • n8n • Process Automation • AI APIs • Artificial Intelligence (AI) • Tailwind CSS • Zustand • Expo • HTML5 • CSS3 • Figma • Application Deployment • Git Flow

Education

Estácio Maceió, Brazil
Technologist Degree in Systems Analysis and Development 06/2024 - 07/2026

Languages

Portuguese Native English Intermediate (B1)
